

Websites After AI

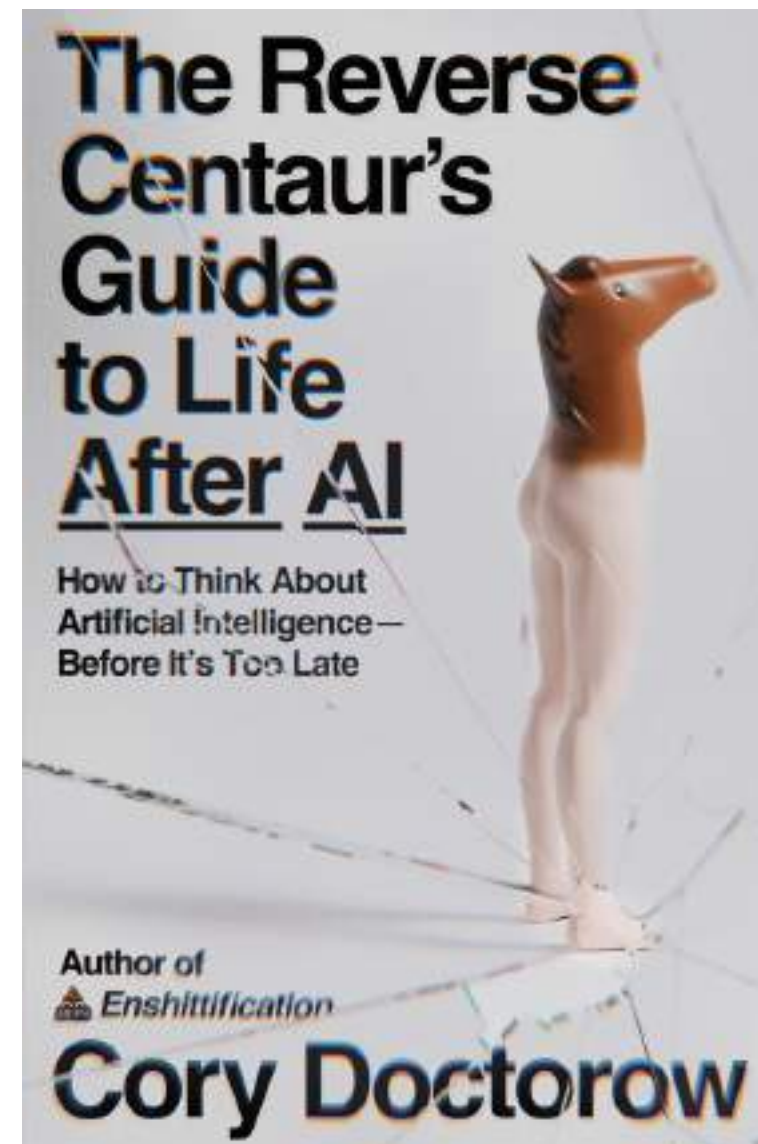

WHAT OWNERS & CREATORS SHOULD KNOW

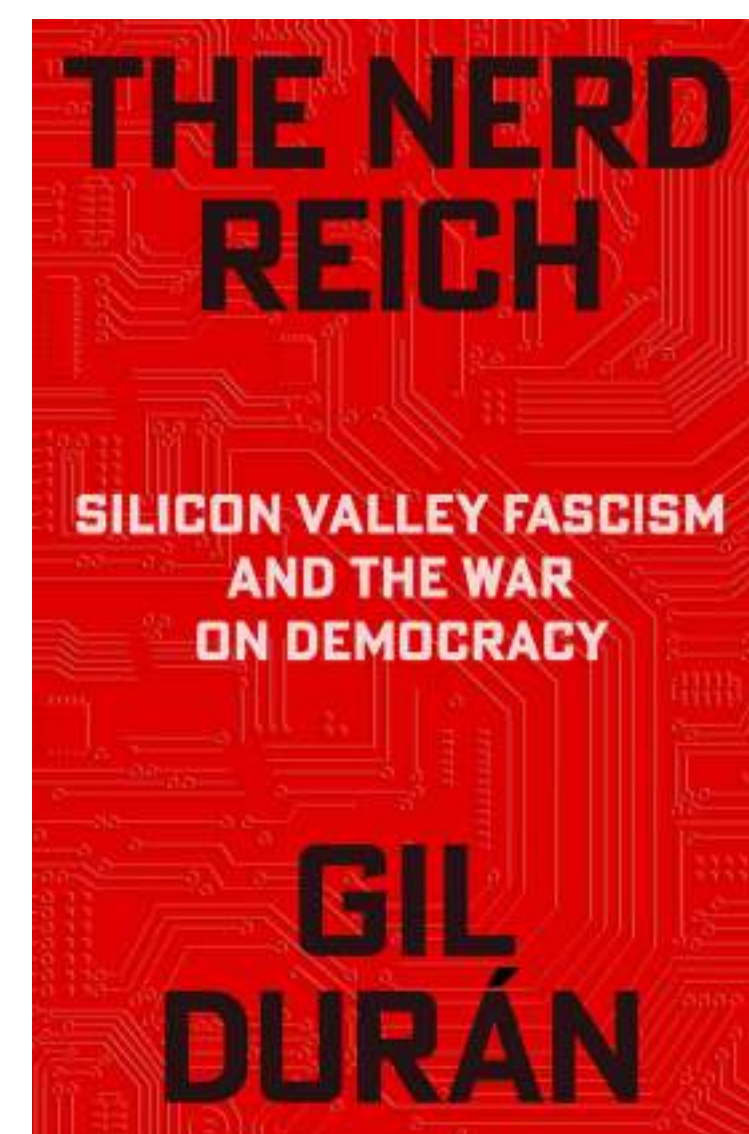

Some background reading

This help us separate the hype of generative AI from predictive AI and AGI (Artificial General Intelligence).

This recommends reclaiming AI for human agency rather than taking a divisive pro or anti AI stance.

This looks historically at the ideology some of the most powerful people in tech.

Where we are now

- Jensen Huang, CEO of NVIDIA has declared that “AGI has arrived” in a response the launch of GPT-6 .
- The Hugging Face breach. The UK’s AI Security Institute reporting AI engaging in sustained deception to bypass human verification and earlier OpenAI agents had hijacked a German Wikipedia-style developer site.
- Jacob Coxon of OpenAI then Anthropic resigned in September warning both companies are “gambling with our lives” and it could kill us all in a decade.
- Bernie Sanders federal bill calling for an outright, permanent ban on superintelligence and an immediate pause on frontier AI.
- China seeing AI dialogue as key deliverable for September 24 leaders' summit.

What LLMs do well

- Turning a client interview into a first content outline.
- Suggesting content and structure.
- Explaining unfamiliar code.
- Producing test content and edge cases.
- Finding obvious inconsistencies.
- Comparing browser behaviour.
- Acting as a second pair of eyes during debugging.
- Creating first-pass documentation.
- Help solo practitioners explore ideas and create appropriate visuals.

Train as a Couples Therapist with Imago Relationship Therapy

A flexible, modular training pathway for counsellors and psychotherapists who want to work confidently with couples.

- Start with 2 days with no further commitment
- Build up to 12 days for advanced clinical training
- Work towards becoming a certified Imago Relationship therapist
- Choose online or in-person at the Affinity Centre Cheadle

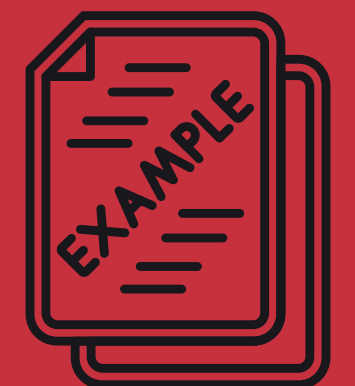

[THE TRAINING PATHWAY](#) [READ FAQS](#)

A line drawing illustration of three people in a therapy session. A woman wearing a hijab is seated on the left, a woman is seated in the middle, and a man is seated on the right. They are all facing each other in a circle. In the background, there is a framed picture on the wall with the word 'IMAGO' and a logo, a potted plant, and a bookshelf.A line drawing illustration of a group therapy session. A man and a woman are standing at the front of a room, facing a group of people seated in a circle. The man is pointing to a flipchart. There is a small table with a plant in the center of the room.

Attend at the Affinity Centre in Cheadle, Cheshire.

A line drawing illustration of a Zoom video conference. The screen is divided into a grid of video feeds. The top row shows two large feeds of a man and a woman. Below them are several smaller feeds of other participants. At the bottom of the screen are icons for video, chat, and other controls.

Join live on Zoom from anywhere in the UK or beyond.

What LLMS does not do well

- Local knowledge.
- Tacit business context.
- Personal reputation.
- Nuance and tone.
- Truthfulness about services.
- Understanding untypical users.
- Long-term maintenance.
- Accountability for consequences and making trade-offs.
- Knowing what information is missing.

Debates among web creators

- AI will take the easy jobs - small brochure sites are precisely the work AI can automate.
- Clients don't care about standards - they only want something attractive and inexpensive.
- AI makes everyone creative - More people can now create websites, so the web becomes more democratic.

A practical professional manifesto

1. Use AI for acceleration, not authority.
2. Keep humans responsible for facts and consequences.
3. Treat generated code as untrusted code.
4. Never confuse fluency with understanding.
5. Protect client confidentiality and consent.
6. Prefer portable, inspectable outputs.
7. Test the result with real users and real devices.
8. Preserve HTML, CSS, accessibility, performance, and progressive enhancement.
9. Charge for judgement, not keystrokes.
10. Make clients less dependent on platforms - including your own tools.
